Friends' Profiles

The University of Toyama (富山大学) is a Japanese national university, which located in Toyama Prefecture. This university is famous for its department of pharmacy with 130 years history and university hospital with providing service of traditional Sino-Japanese medicine. In particular, it has the only national institute of natural medicine where has brought up over hundreds of foreign master and/or doctoral students in the field of natural medicine.

Name & Title : Naotoshi Shibahara, M.D., Ph.D., Professor

Affiliation : Division of Kampo Diagnostics, Institute of Natural Medicine, Toyama University

Professor Shibahara graduated and got his doctor degrees at Toyama University. He is not only a scientist in the fields of basic research on natural medicine, but also is a licensed clinician serving at the University hospital, providing treatment of traditional Sino-Japanese medicine to outpatients.

Due to his unique background, his research area is focused on...

1. To clarify pharmacological actions of Kampo prescriptions through basic and clinical study based on the viewpoint of Kampo diagnostics.
2. To find some objective parameters to evaluate the state of illness based on clinical study and traditional approaches.
3. To develop and push a medical training program of Kampo Diagnostics on the basis of integration of the traditional approaches and scientific evaluation.

Ritsumeikan University (立命館大学) is a private university in Kyoto, Japan with about 100 years history. This university is known as one of western Japan's four leading private universities. About 10 years ago, College of Pharmaceutical Sciences is founded to offer a six-year curriculum education program of fostering pharmacists.

Name & Title : Ken Tanaka, Ph.D., Professor

Affiliation : Graduate School of Pharmacy, Ritsumeikan University

Professor Tanaka graduated and got his doctor degrees at Toyama University. After graduation, he served as a chemical scientist at National Research Institute of Police Science to develop swift and precise analytical methods of detecting and identifying various types of drugs such as cocaine and drug metabolites.

Since 2002, he came back to his alma mater, Toyama University as associate Professor and then in 2015, he has been invited to be professor by Ritsumeikan University to build Graduate School of Pharmacy. Currently, his research is focused on...

1. Metabolomic analysis of secondary metabolites in medicinal plants.
2. A novel study of natural-product chemistry applying chemometrics.
3. Development of the database on crude drug and Kampo medicine.

Nagoya City University (名古屋市立大学), is a public university in Nagoya city, Japan. The history of the School of Pharmaceutical Sciences, dates back to a private pharmacy school, Nagoya School of Pharmacy founded before 130 years. At present, the School of Pharmaceutical Sciences consists of 19 departments and Educational Research Center for Clinical Pharmacy as an affiliated institute, and 59 full-time faculties.

Name & Title: Toshiaki Makino, Ph.D., Professor

Affiliation : Dept. of Pharmacognosy, Graduate School of Pharmaceutical Sciences, Nagoya City University

Professor Makino graduated and got his doctor degrees at Kyoto University in 2000, and then served as assistant professor at Hokkaido College of Pharmacy, a private university in Hokkaido. After a short stay in USA in 2013, he moved to Nagoya City University as Lecturer and Assistant Professor working on pharmacognosy education and has been promoted as Professor in 2015.

It is his background of a short studying abroad in USA and actively interacting with China that, he is actively to work on introducing TCM textbooks of China into his pharmacist education. His research fields are closer to applied research including building specification of herb medicines for pharmaceutical manufacturing.

Congratulations!

•
The CGCM Journal publishes state-of-the-art papers that present innovative and relevant research spanning various areas of the pharmaceutical sciences impacting human therapeutics. The journal also:
Has a ...% overall satisfaction score from Springer Nature surveys

•Administers fast peer review:

- Less than ... day from submission to editor review
- The average first decision time is ... days for manuscripts selected for peer review
- The average time from submission to final decision is ... days

•Responds to inquiries within one business day, and direct access to the Editor-in-Chief

•Is overseen by a distinguished team of international Associate Editors and Editorial Advisory Board

•Offers international readership with over ... downloads per year; full-text articles available at over ... institutions worldwide

•Publishes accepted manuscripts online within an average of ... days (includes time for proof approval by authors)

•Uses a continuous publishing model, so articles can be cited immediately upon publication

•Does not levy submission or publication charges (unless choosing Open Choice)

•Offers free color publication and supplemental files

Factory in Japan

The Group's Japanese subsidiary, SODX, owns a pilot factory, certified with Health Food GMP, which is located in Osaka, Japan with total gross floor area of approximately 1,460 sq.m. The factory is equipped with high technology production machine which enables SODX to produce health food in different packaging and dosage form like granule, tablet, capsule etc. to fulfill the specification of customer's need. The pilot factory will also act as the Group's new product development for further business expansion. The best selling products of SODX include anti-oxidants, fermented health food as well as health food developed from propolis.
